- 1,575+ Oracle Cloud certifications
- Global delivery model
- Continuous Innovation work with Oracle on product development and roadmap
- 500+ Live Clients on Oracle Cloud
- 220+ ERP clients
- 150+ Consolidation clients
- 300+ Planning and Cost Allocation clients
- 60+ Master Data Governance clients

# How Cloud is Different?

The transition of support skills

# Grounded in Experience: **Avoiding Common Pitfalls**

Establish a governance model to tackle tough decisions

Develop guiding principles and stick to them

**Adopt the cloud functionality as delivered; Don't customize**

Clear entrance and exit criteria

**Key resources dedicated to the project**

Early and consistent change management is critical, start your training plan early

**Leverage onshore resources for collaboration & efficiency**

**Early focus on data conversions and integrations is key**

**Allocate sufficient time to the design**

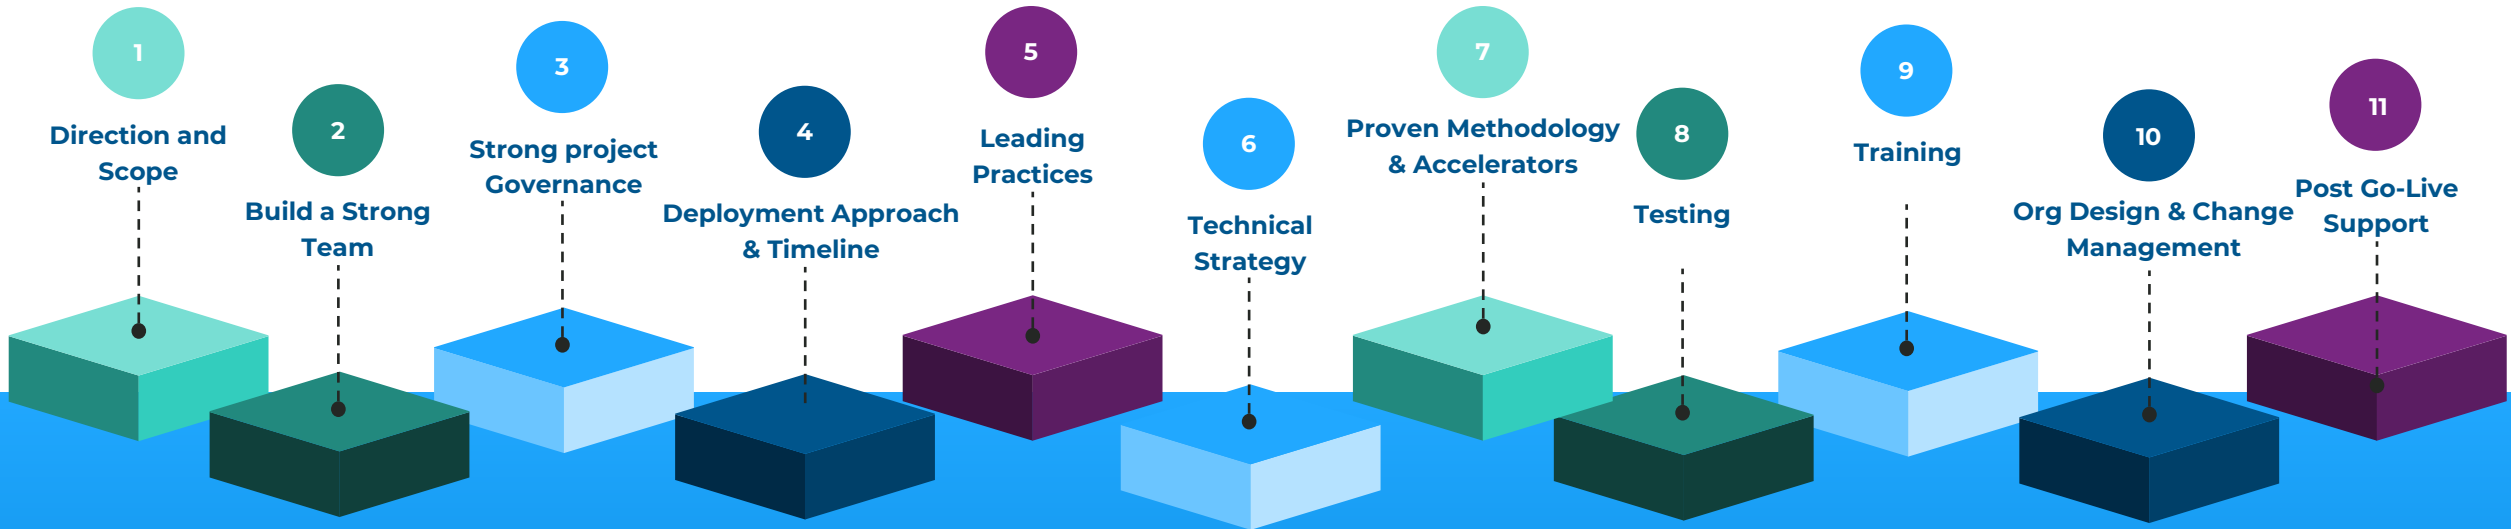

Be prepared to adapt your organizational structures and realign job responsibilities

# Survey #1

# Implementation Approach

## Pillars of Success

# CLEAR Methodology

Data governance

Integration

Solution sustainability →

Change Management →

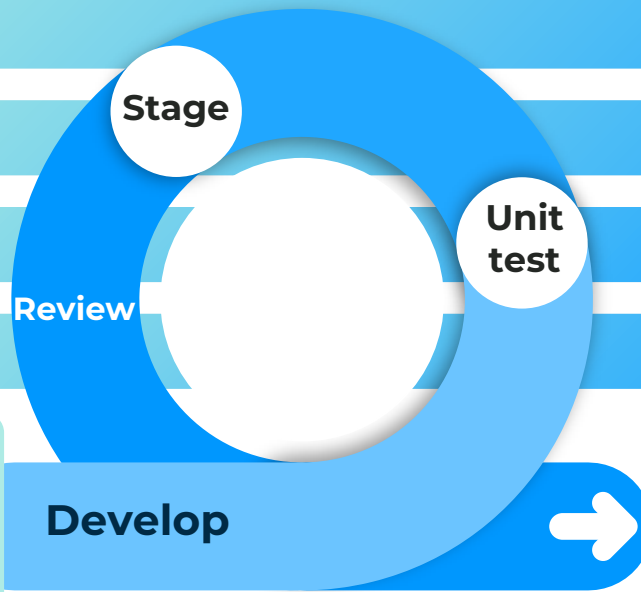

**Launch** →

Project kick-off

**Define** →

Define gap against pre-seeded functional catalog and define solution

**Develop** →

Iterative configuration & development with hands-on validated sessions

**Confirm** →

Confirm the solution in SIT/E2E and UAT

**Transition** →

Transition the solution to production

**Sustain** →

Sustain the solution

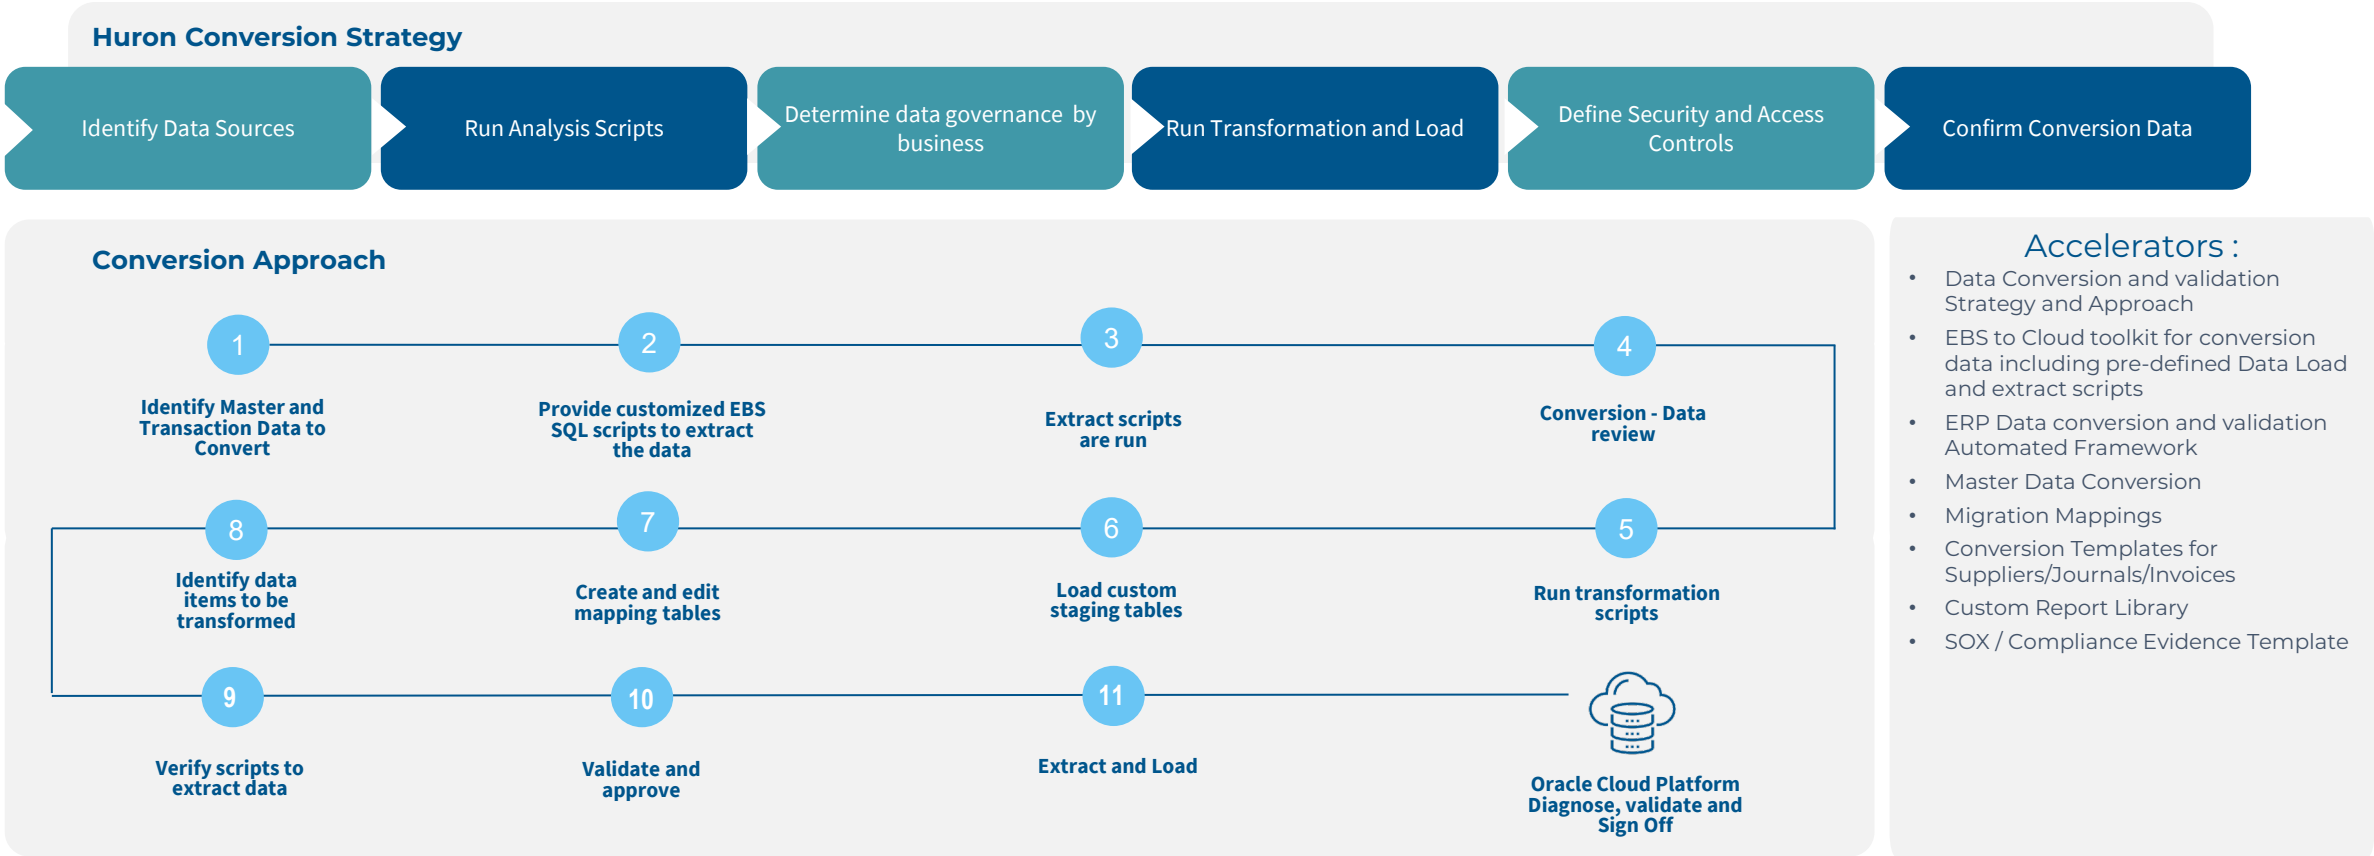

Project Management →

Project health review      **ENGAGEMENT ASSURANCE**      Net promoter Score

# Our Approach to Data Conversion

Data conversion is one of the most critical components and plays a key roles in project success. Our approach for data extraction, cleansing and integrity, transformation, import and validation guarantees successful conversion and reconciliations

**Accelerators :**

- Data Conversion and validation Strategy and Approach
- EBS to Cloud toolkit for conversion data including pre-defined Data Load and extract scripts
- ERP Data conversion and validation Automated Framework
- Master Data Conversion
- Migration Mappings
- Conversion Templates for Suppliers/Journals/Invoices
- Custom Report Library
- SOX / Compliance Evidence Template

# Common Conversion Challenges

Challenge	Huron's Approach
 <b>Data Complexity &amp; Volume</b>	<p>We implement a phased data conversion strategy, with clear data mapping. Tools like More4apps are used for efficient off-system staging and handling of large data volumes, simplifying management.</p>
 <b>Ensuring Data Quality &amp; Accuracy</b>	<p>Our approach emphasizes strong data governance from the start. We facilitate iterative validation cycles involving your business users, leveraging tools like More4apps for user-friendly, pre-load data cleansing and accuracy checks.</p>
 <b>Time Pressures &amp; Project Deadlines</b>	<p>Huron employs an efficient, proven methodology refined over many projects. We utilize tools like More4apps &amp; CAT that can accelerate specific data handling tasks, guided by our experienced consultants.</p>
 <b>Limitations of Standard Oracle Tools</b>	<p>We strategically augment standard Oracle tools with user-friendly, Excel-based solutions like More4apps. This simplifies data preparation, validation, and error correction for business teams, reducing their dependency on IT for many data tasks.</p>
 <b>Business User Involvement &amp; Buy In</b>	<p>We champion clear communication and defined roles, such as Data Stewards from your business teams. We empower these users by providing accessible tools (like More4apps) so they can take ownership of their data's quality, and we incorporate their feedback throughout the process.</p>

# Introduction to More4Apps

## Finance Module

- Payables Invoices
- Receivables Invoices & On-Account Credit Memos
- Holds & Releases
- Suppliers
- Customers (New)
- Asset Additions, Adjustments & Transfers (Coming Soon)
- Customer & Supplier Payments (Coming Soon)

- Items
- Structures
- Item Relationships

## Projects Module

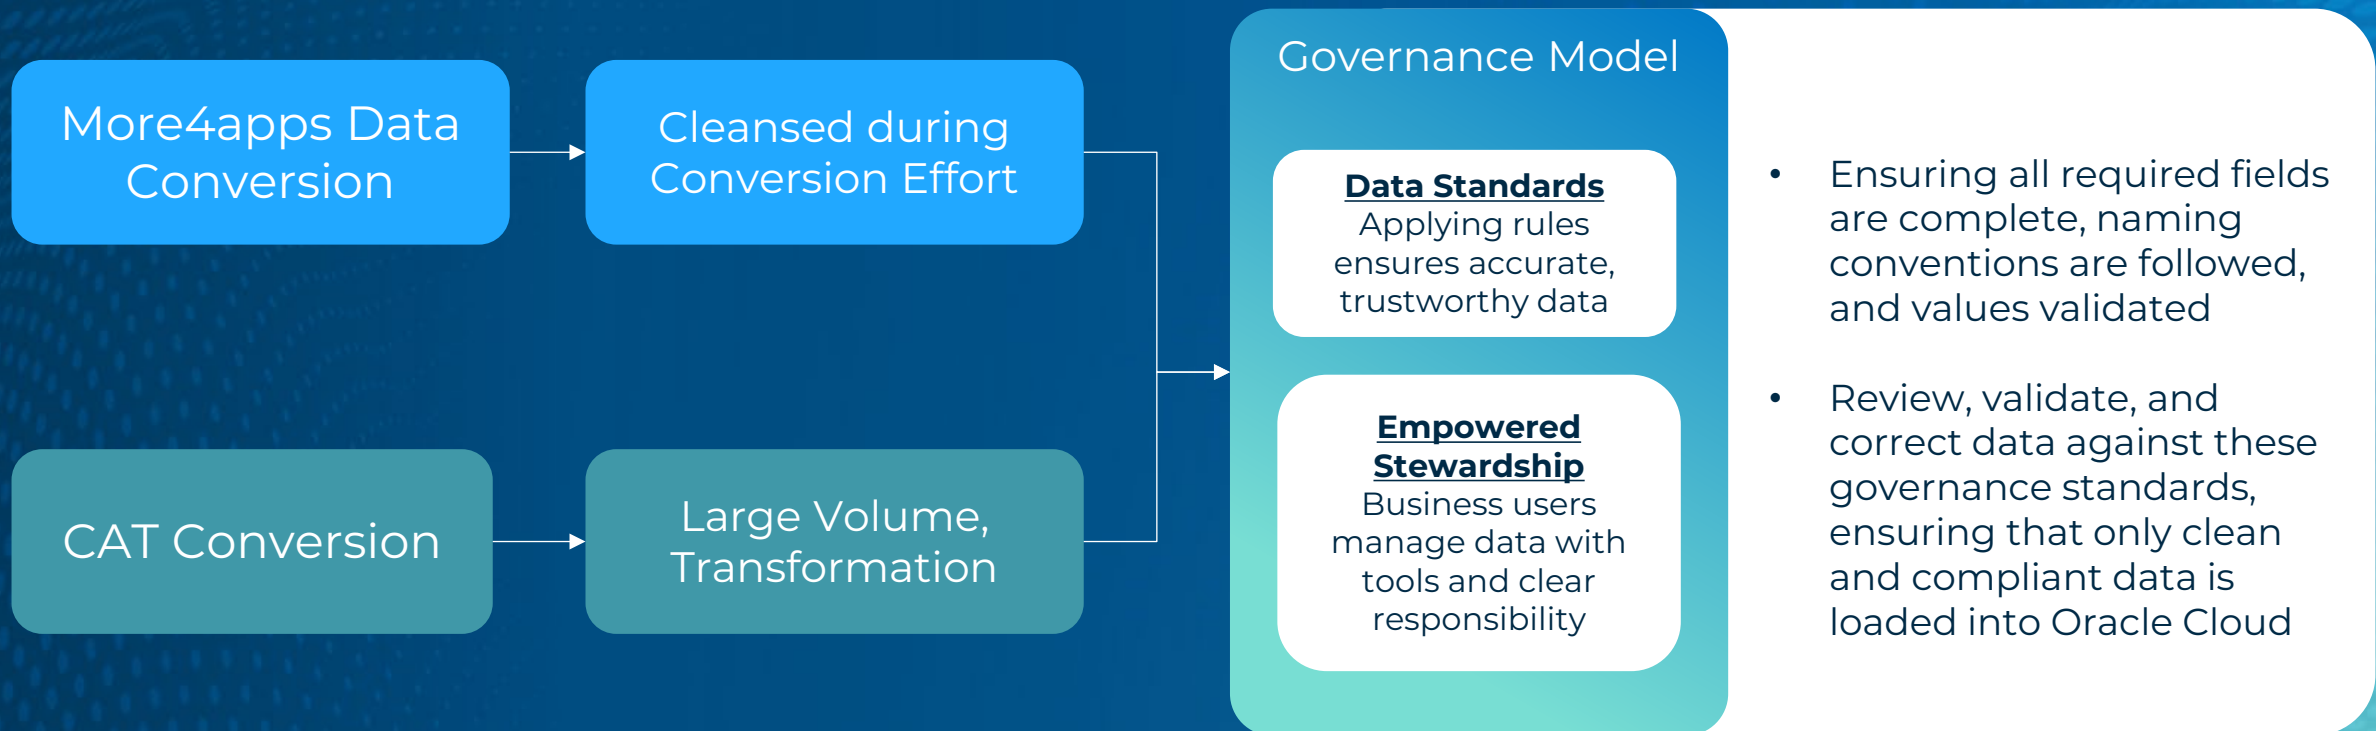

- Financial Projects
- Costs
- Assets & Assignments
- Award Budgets
- Financial Plan Resource
- Assignments
- Budgets
- Cost Adjustments
- Planning Resource Breakdown Structures (RBS)
- Project Templates
- Contracts
- Amend Contract Status
- Events (New)
- Forecasting (Coming Soon)

## Procurement Module

- Standard Purchase Orders
- Cancel & Close Purchase Orders
- Requisitions
- Document Builder

# How More4apps Integrates into Our Methodology:

User-Friendly Data Preparation for Efficient Loading

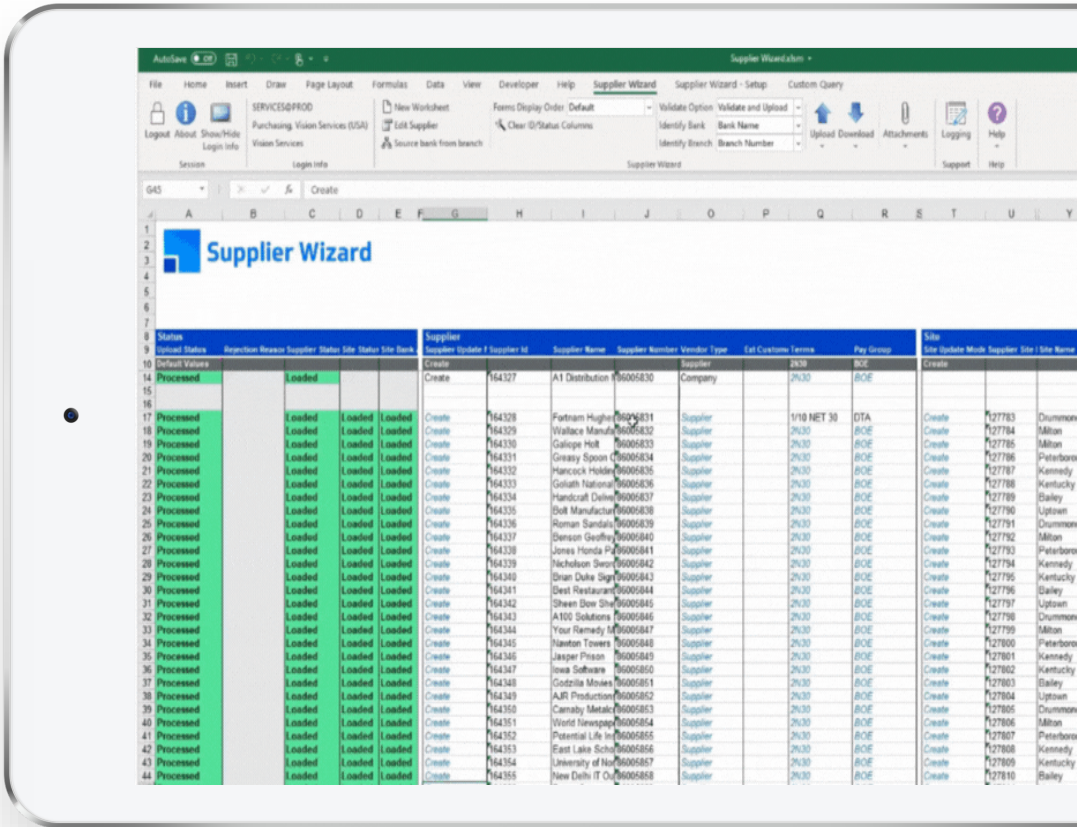

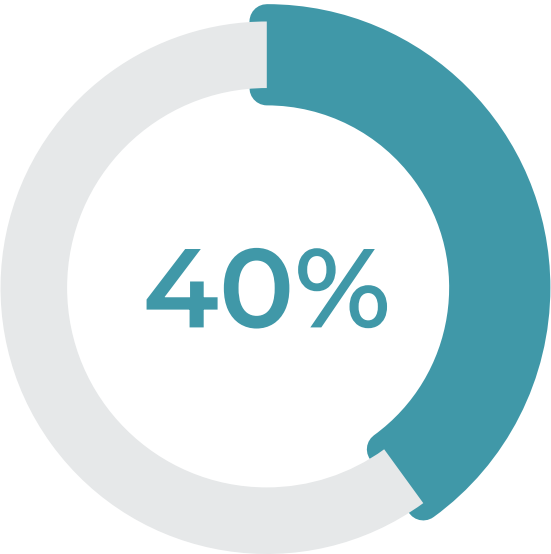

# Real-World Impact

What has been the real-world benefits in time savings with data conversion leveraging More4Apps?

# Survey #2

# How these results benefit You:

1

**Lower Project Costs and Faster Time to Value**

2

**Increased Confidence in Your Business Data**

3

**Empowered Teams and Smoother Operations**

4

**Reduced Project Risk and Greater Predictability**

5

**Maximized Return on Your Oracle Cloud Investment**

# Partner with Huron for Success

1

**Proven Expertise, Measurable Results**

2

**User-Focused for Sustained Success**

3

**Reduced Conversion Risk, Increased Data Confidence**

4

**Enhanced Efficiency Beyond Standard Practices**

5

**Maximize your cloud investment**
